The image displays two educational cards for CVC (Consonant-Vowel-Consonant) words. Each card is designed to look like a spiral-bound notebook and is divided into three sections by vertical lines. The top card shows the word 'bed' with a blue 'b', a red 'e', and a blue 'd'. Above the letters is a drawing of a bed with a blue floral blanket. The bottom card shows the word 'log' with a blue 'l', a red 'o', and a blue 'g'. Above the letters is a drawing of a log with a cross-section showing a tree ring. Below each section of the cards are labels: 'Consonant' for the first and third sections, and 'Vowel' for the middle section. To the right of the cards, the letters 'CVC' are written in large, bold font, with the 'V' in red and the 'C's in blue.

Non-fiction

As I was going to St. Ives,
I met a man with seven wives,
Each wife had seven sacks,
Each sack had seven cats,
Each cat had seven kits:
Kits, cats, sacks, and wives,
How many were there
going to St. Ives?

Answer: Seven

extraordinary CAT FACTS

Animals in pictures - the person holding the paper! The cats, mice, cat and kittens were all going to the opposite direction!

Cats can hear the ultrasonic noises that rats and dolphins make to communicate

A cheetah is the fastest animal in the world and can run at **75 MILES PER HOUR**. Even a pet cat - a fast one - can beat Usain Bolt, the fastest man in the world, who runs at 27 mph.

The ridged pattern on cat's nose is as individual as a human's fingerprint.

Because of a cat called Mousie who lived in East Europe and lit up with static electricity one night and produced a shower of sparks like an incandescent lightning storm, a boy called Tesla was inspired to learn more about electricity and became a famous scientist. Without Mousie or his cat, we might not have electricity in our homes today or any of the devices and gadgets we use every day!

Cats can make over 100 noises - but only four big cats, the lion, tiger, leopard and jaguar, can roar. When you are five miles away you can still hear a lion's **ROAR**

CATS SLEEP SO MUCH THAT, BY THE TIME A CAT IS 9 YEARS OLD, IT WILL ONLY HAVE BEEN AWAKE FOR THREE YEARS OF ITS LIFE.

CATS HAVE MAGNETIC BRAINS! Cats are very good at finding their way home over long distances - this 'homing instinct' is most likely due to a special kind of magnetic sense which means they can use the earth's own magnetic field to guide them home.

C'est alors qu'elle entend une petite voix
qui lui dit : « Merci ! »
« Ça alors ! s'écrie Lola,
Grenouille, c'est toi qui parles ? »
« Oui, c'est moi, répond la grenouille.
Tu m'as sauvée. Tiens, pour te remercier,
je vais te faire un cadeau. »
La grenouille laisse à Lola
un drôle de caillou blanc,
puis, d'un bond, elle repart se cacher.
